

Leonardo da Vinci · Mona Lisa · c. 1503–1519

Louvre, Paris

LEONARDO DA VINCI 1452–1519

Leonardo da Vinci was a painter, inventor, engineer and scientist who filled notebooks with flying machines and studies of anatomy. His portrait of a Florentine woman, probably Lisa Gherardini, is famous for her calm gaze and gentle smile, softened by sfumato, a technique of hazy, smoky shading with no hard outlines.

Did you know?

In 1911 the Mona Lisa vanished from the Louvre. The thief was Vincenzo Peruggia, a museum worker who hid inside overnight. It was found in Florence more than two years later and returned to Paris in 1914.
